T-TOP VERSION

The 6th generation of the legendary Flyer range is reaching its peak! After the launches of Flyer 8, 10, 7 and 6 in the past 18 months, here is the "new" family member: the FLYER 9!

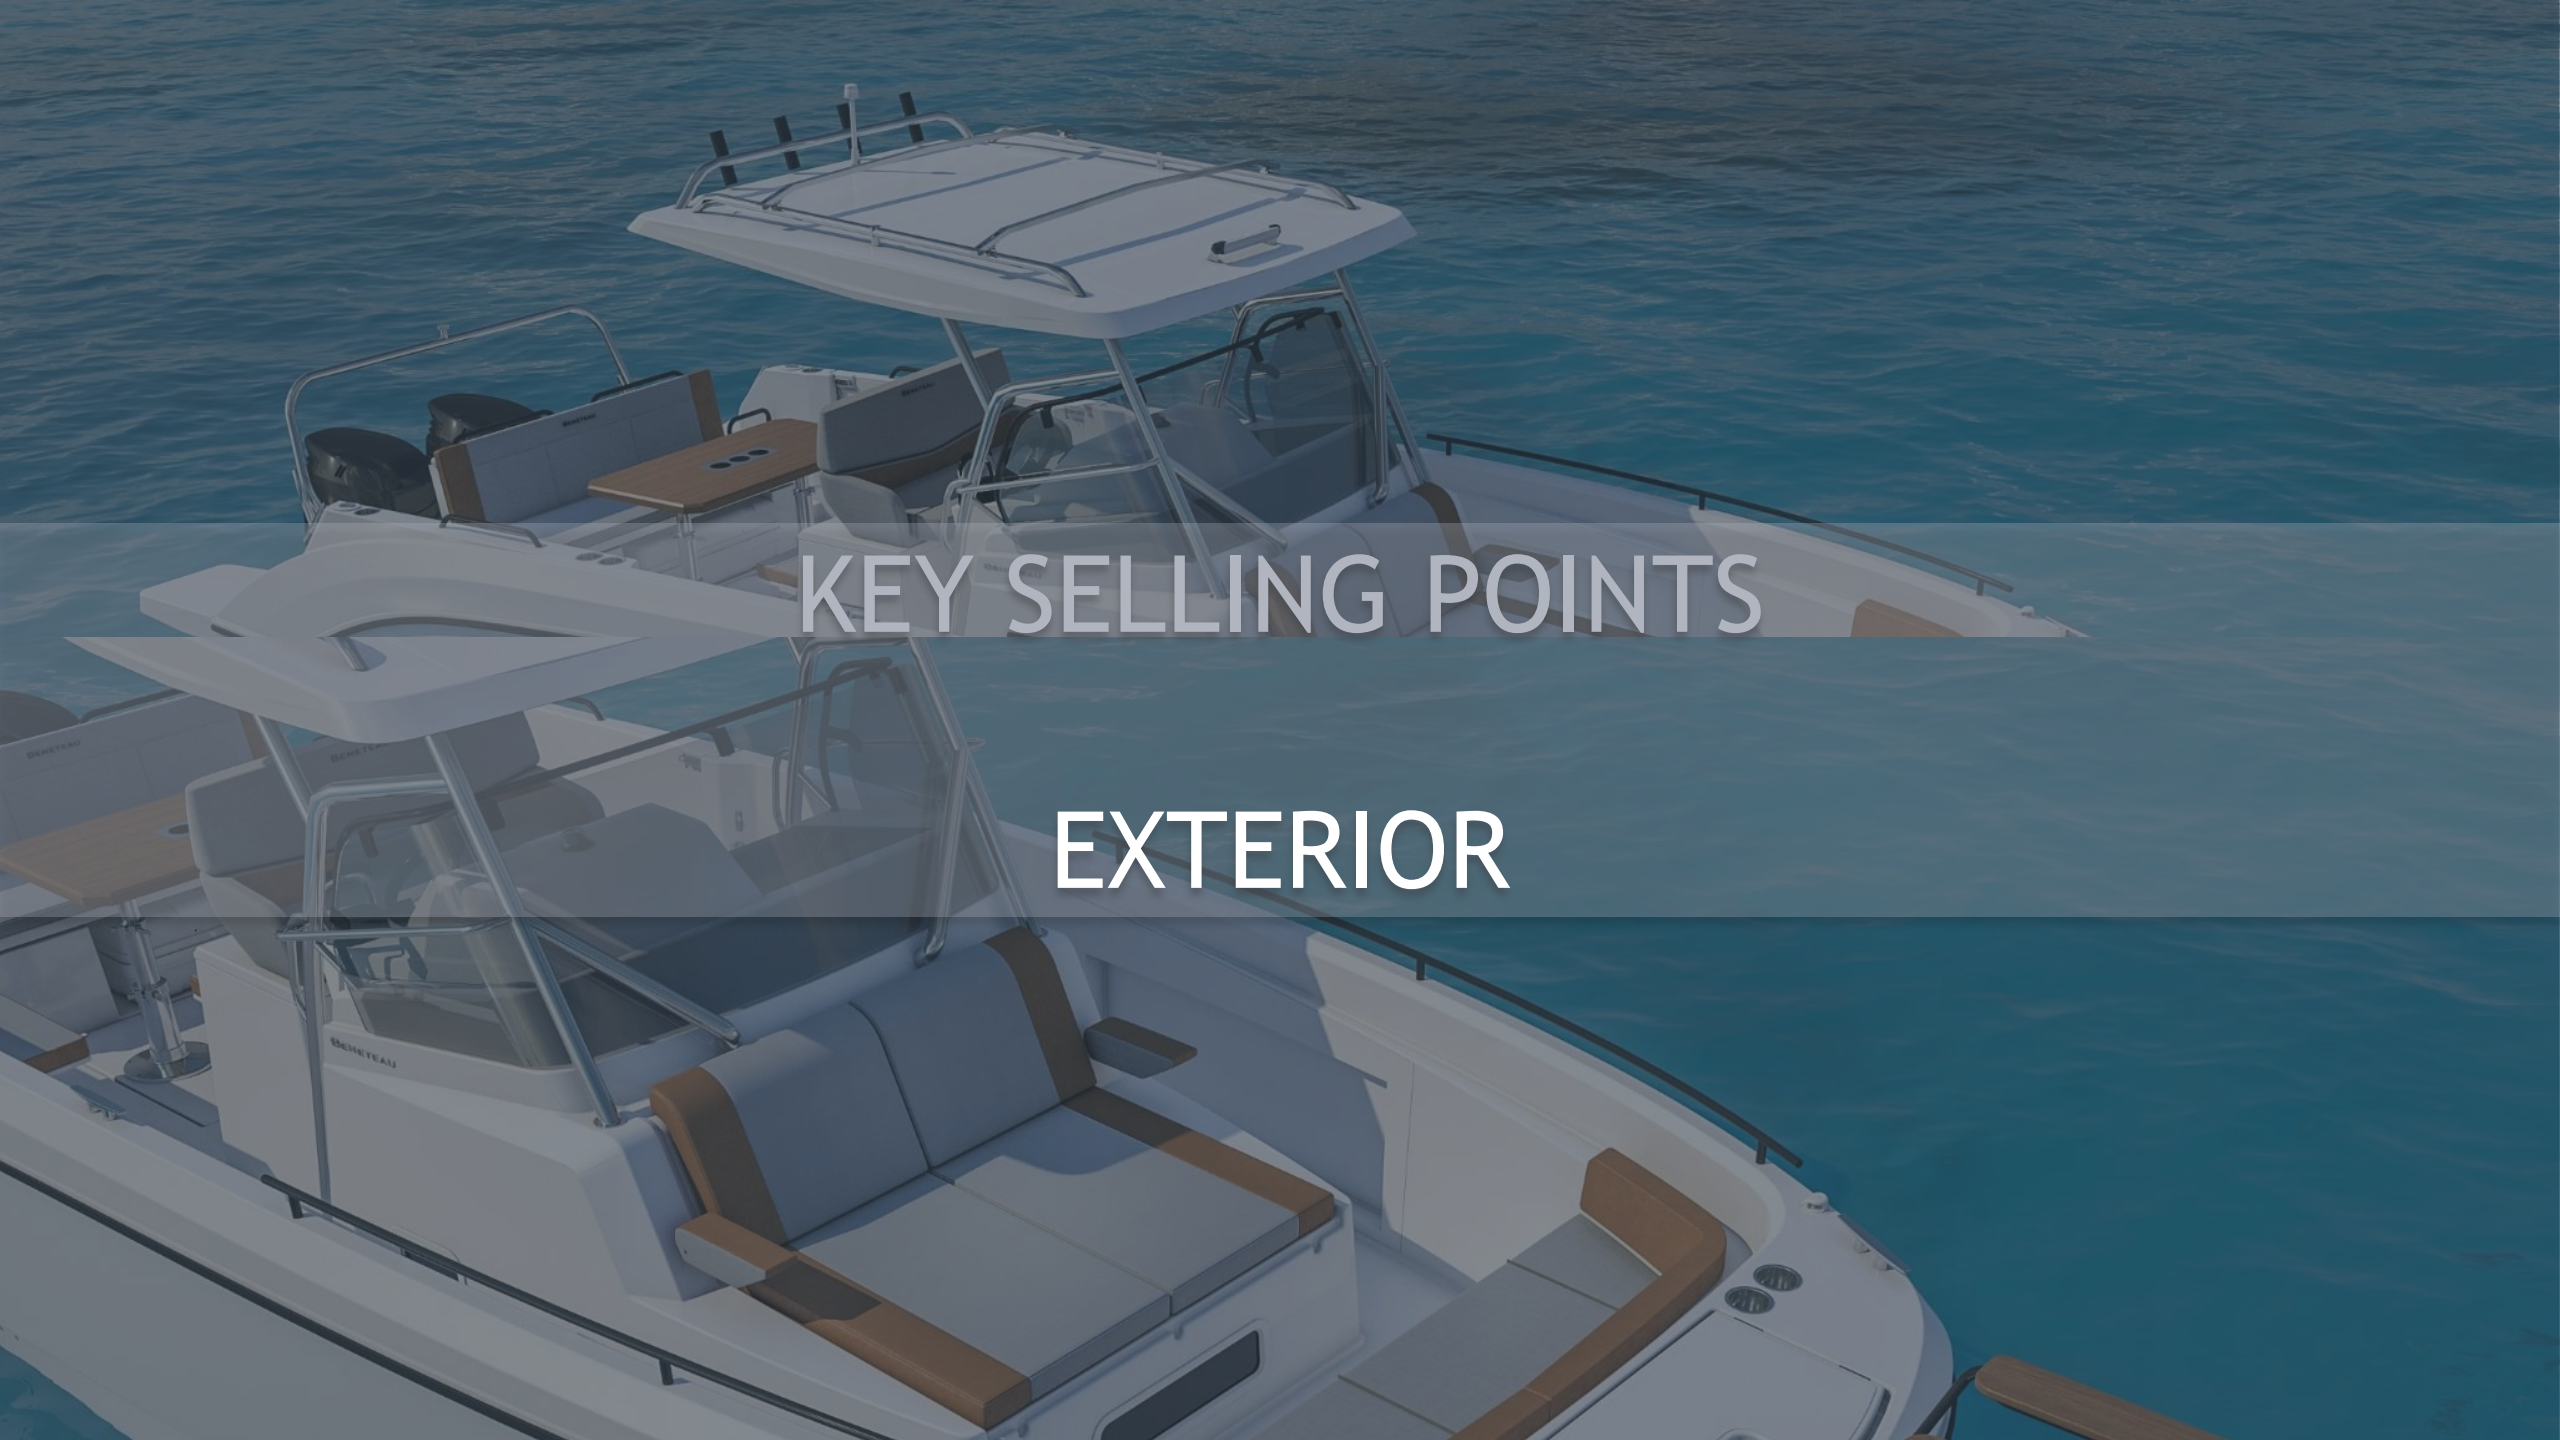

Perpetuating the characteristics of dynamism and elegance of its predecessor, the Flyer 8.8, it also accentuates its comfort and space on board thanks to an optimized modularity.

The Flyer 9 incorporates all the styling and deck optimization advantages that already make the success of other boats in the range. It is offered in two versions (Sundeck and Spacedeck) and with two atmospheric universes to choose from (standard and elegance).

But this Flyer 9 does not stop there and has all the assets to attract a demanding boaters looking for features and sensations !

- It has a side platform on portside to considerably enlarge the cockpit
- Even in its open hull version "spacedeck" the Flyer 9 offers an interior equipped with two double berths and a head
- The maximum motorization can go up to 500 CV to reach more than 40 knots in a few seconds!

- Side foldable platform
- Air Step 2 hull
- Deck layout modularity

The image shows two white motorboats on a body of blue water. The boat in the foreground is a larger model with a white cabin and a large, flat white roof. It has grey and brown upholstered seating, a wooden table, and a steering console. The boat in the background is a smaller model with a similar design. A semi-transparent dark blue horizontal band across the middle of the image contains the text "KEY SELLING POINTS" in white, uppercase letters.

The image shows the interior of a yacht. In the background, there is a large bed with several grey and white pillows. Above the bed is a porthole window. In the foreground, there is a wooden table with a laptop on it. To the left of the table is a metal ladder. The walls and cabinetry are made of dark wood. The floor is covered with a grey carpet.
